## DETAILED ACTION

### *Claim Objections*

1. Claim 13 is objected to because of the following informalities: The phrase "the method" has insufficient antecedent basis in the claim. Appropriate correction is required.
2. Claim 15 is objected to because of the following informalities: Claim 15 depends from claim 18. However, there is no claim 18. Appropriate correction is required.

### *Double Patenting*

3. Claim 17 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 13. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-3, 6-7, and 10-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamashita et al. (US 6,874,902 B2).

Art Unit: 2875

6. Re claims 1-3, 6-7, and 10-17: Yamashita discloses a back light display device having an optical source, a light guide, and optical substrate, and the optical substrate having a plurality of prism structure having two curved sides (See Fig. 1 and 2).

***Claim Rejections - 35 USC § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamashita as applied to claim 1 above, and further in view of Ookawa et al. (US 6,628,460 B1).

Re claims 8-9: Yamashita does not disclose the peak angle of the prism structure and the refractive index. However, Ookawa discloses an optical substrate having a prism structure characterized by a peak angle in the range of 80 degree to 100 degree (col. 5, line 58) and a refractive index of 1.6 or more (col. 5, line 65). It would have been obvious to one having ordinary skill in the art at the time of the invention to adjust the peak angle and refractive index in order to enhance the luminance of the planar light source device (col. 5, line 50-67).

**Allowable Subject Matter**

10. Claims 4-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2875

11. The following is a statement of reasons for the indication of allowable subject matter:

With regard to claims 4-5, the prior art of record does not disclose the claimed optical substrate having a prism structure characterized by a cross section having curved sides described by the equation as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
